COMPSCI761 Advanced Topics in Artificial Intelligence

Course Information

Semester 2, 2020

Prerequisites and restrictions

Prerequisites:
Approval of the Academic Head or nominee

Restriction:
COMPSCI 367

Course Description

Covers the cornerstones of AI: representation, utilisation, and acquisition of knowledge. Take a real world problem and representing it in a computer so that the computer can do inference. Tasks that demand utilising this knowledge and acquiring new knowledge through search which is the main technique behind game playing, planning, and natural language processing. Discuss the social impact and ethics of AI.

Staff involved in the course

Lecturers

- Michael Witbrock, Room 303-427, m.witbrock@auckland.ac.nz
- Ian Watson, Bldg 810 Room 829, ian@cs.auckland.ac.nz
- Pat Riddle, Room 303-490, pat@cs.auckland.ac.nz
- Jiamou Liu, Room 303-487, Jiamou.liu@auckland.ac.nz

Correspondence with Lecturers & Tutors

All email to staff MUST have the course number at the beginning of the subject line of the email, e.g., CompSci 761. If the subject line then does not have this, then your email may be ignored.

Timetable

Lectures

<table>

</tr>
</tbody>
</table>

Course Outcomes

A student who successfully completes this course should be able to:
• Demonstrate the ability of representing, in a declarative way, what it means for something to be a solution to a given problem.
• Understand the main heuristic-search-based approaches to problem solving and their pro's and con's.
• Develop heuristic-based search strategies to solve AI problems
• Explain and communicate knowledge representation and intermediate knowledge representations.
• Demonstrate an understanding of data driven and goal driven inference and can program a declarative rule-based system.
• Develop and demonstrate the ability on predicate calculus and prolog programming.
• Demonstrate an understanding of tools and applications in natural language processing.

Assessments

Requirements for passing

You have to pass both the theory [the exam and test] and the practical [i.e., assignments] components to pass this course. The exam is worth 60% of the total marks, mid-term test is worth 10% of the total marks, and the assignments are worth 30%.

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Practical</td>
<td>30%</td>
<td>Assignments</td>
</tr>
<tr>
<td>Theory</td>
<td>10%</td>
<td>Test</td>
</tr>
<tr>
<td></td>
<td>60%</td>
<td>Exam</td>
</tr>
</tbody>
</table>

Assignments

There will be 4 assignments. The topics of the assignments are shown in the table below:

<table>
<thead>
<tr>
<th>Available</th>
<th>Due</th>
<th>Value</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>29/7</td>
<td>19/8</td>
<td>7.5%</td>
<td>Predicate Calculus and/or Prolog</td>
</tr>
<tr>
<td>12/8</td>
<td>4/9</td>
<td>7.5%</td>
<td>Search</td>
</tr>
<tr>
<td>26/8</td>
<td>2/10</td>
<td>7.5%</td>
<td>Knowledge Representation</td>
</tr>
<tr>
<td>30/9</td>
<td>21/10</td>
<td>7.5%</td>
<td>Planning or Constraint Satisfaction</td>
</tr>
</tbody>
</table>

The assignments will be submitted via Canvas.
Test

The term test is worth 10% of your final mark. The provisional date for the test is Tuesday 1 September, 2020 from 6:30pm -7:30pm (Please note that this is subject to possible change. You will be notified of any changes through Canvas). The test is closed book, calculators, and cell phones are not permitted. Results will be posted on Canvas. If you have a test timetable clash, please contact the course coordinator, Jiamou Liu, as soon as possible.

Exam

The final exam is worth 60% of your final mark. Please check Student Services Online for the exam time and date. The exam is closed book, and calculators are not permitted. Provisional exam results can be obtained from Student Services Online.

Lecture Schedule (Tentative)

Lecture Topics

Week 1
- Introduction - History/Future of AI
- Logic

Week 2
- Logic cont’d
- Search

Week 3
- Search cont’d

Week 4
- Search cont’d
- Adversarial Search (Game Playing)

Week 5
- Adversarial Search cont’d
- Knowledge Representation

Week 6
- Knowledge Representation cont’d

Week 7
- Knowledge Representation cont’d

Week 8
- Knowledge Representation cont’d
- Constraint Satisfaction

Week 9
- Constraint Satisfaction cont’d
- Planning
Week 10
- Planning cont’d

Week 11
- Planning cont’d
- Natural Language Processing

Week 12
- Natural Language Processing cont’d
- The Ethics of AI
- Review

Assistance
There are a number of places where you can seek assistance with your learning. The best place to start is by asking questions on Piazza. If you have any questions about the lectures or about the assignments, those questions belong on Piazza so that everyone can benefit. However, assignment code should not be posted on Piazza.

Office Hours
All staff have office hours when they are available to students. You are encouraged to come and discuss any matters arising from the course during those hours. Staff are also frequently available at other times.

- Michael Witbrock: TBA
- Ian Watson: By arrangement (send email to arrange meetings and/or drop by)
- Pat Riddle: By arrangement (send email to arrange meetings and/or drop by)
- Jiamou Liu: By arrangement (send email to arrange meetings and/or drop by)

Lecture Recordings
All lectures are recorded. They may be a delay of 1 or 2 days before the lecture recordings are distributed through Canvas. You can find the lecture recordings on the Lecture Recordings.

Note: Although the lectures are recorded, some learning activities conducted in class do not translate well to the recordings. To maximise your learning opportunities, you are encouraged to attend the class in person.

Piazza Policy
- We use Piazza as a forum where you can ask questions and get help. Also in Piazza, we want to encourage and support the graduate capabilities of solution seeking and independence and integrity.
- To achieve this, we will not answer any questions on Piazza in the first 24 hours and give other students and yourself a chance to find the answer on your own.
- After the initial 24 hour period, we will try to answer all questions before another 24 has passed (i.e. within 48 hours of the initial question being posted), excluding weekends and public holidays.
- Please plan ahead and take this into account, especially towards the assignment deadlines. If there are any urgent issues that need to be resolved before 48 hours (for
example technical problems in Canvas), additionally contact us via email to make sure this is not missed.

- If your question is of a personal nature, or relates to a unique situation that will be of little interest to others, then please contact the tutors or teaching staff directly.

Textbook

**Handling illness or absence**

If you must leave for family emergencies etc., PLEASE talk to the lecturer, or somehow get a message to the department. Very few problems are so urgent that we cannot be told quite quickly.

For problems affecting assignments or tests, see the lecturer, as soon as reasonably possible.

For illness during exams (or other problems that affect exam performance) students MUST contact the University within one week of the last affected examination, to apply for an aegrotat pass (for illness) or compassionate pass (other problems). The one week limit is strictly enforced.

Refer to the University information about Aegrotat and Compassionate Considerations:

https://uoa.custhelp.com/app/answers/detail/a_id/11028/~/aegrotat-or-compassionate-consideration-assessment-process

**Academic Integrity**

The University of Auckland will not tolerate cheating, or assisting others to cheat, and views cheating in coursework as a serious academic offence. The work that a student submits for grading must be the student's own work, reflecting his or her learning. Where work from other sources is used, it must be properly acknowledged and referenced. This requirement also applies to sources on the world-wide web. A student's assessed work may be reviewed against electronic source material using computerised detection mechanisms. Upon reasonable request, students may be required to provide an electronic version of their work for computerised review.

For information on the University's Policy on Cheating, please refer to the web page:
